

PRESS RELEASE

Annual General Meeting of Active Biotech AB

The Annual General Meeting of Active Biotech was held on May 5, 2011.

In accordance with the Board of Directors' proposal, it was resolved that no dividend would be paid.

In accordance with the Election Committee's proposal, the Board members Mats Arnhög, Klas Kärre, Magnhild Sandberg and Peter Sjöstrand were re-elected. Peter Hofvenstam, Mef Nilbert and Peter Thelin were elected as Board members. The Meeting also resolved to re-elect Mats Arnhög as Chairman of the Board.

Furthermore, in accordance with the Election Committee's proposal, the Meeting resolved that the Election Committee shall be composed of representatives for the three largest owners, as per end of September, 2011, as well as the Chairman of the Board.

The Meeting approved the Board's proposal concerning guidelines for remuneration to the President and other senior executives. The guidelines essentially conform to the principles applied to date.

In accordance with the Board's proposal, the Meeting resolved to authorize the Board, for a period that does not extend past the date of the next Annual General Meeting, to resolve on the issue of not more than six million new shares and/or convertibles with the corresponding dilution effect, with or without pre-emptive rights for the company's shareholders.

Finally, pursuant to new provisions in the Swedish Companies Act, the meeting approved an amendment of the Articles of Association (Section 7), as follows: Notice of general meetings shall be made through announcement in Post- och Inrikes Tidningar and on the company's website. It shall be announced in Svenska Dagbladet that a notice of a general meeting has been issued.

Lund, May 6, 2011

Active Biotech AB (publ)

Tomas Leanderson
President and CEO

Active Biotech AB (NASDAQ OMX NORDIC: ACTI) is a biotechnology company with focus on autoimmune/inflammatory diseases and cancer. Projects in pivotal phase are laquinimod, an orally administered small molecule with unique immunomodulatory properties for the treatment of multiple sclerosis, TASQ for prostate cancer and ANYARA for use in cancer targeted therapy, primarily of renal cell cancer. In addition, laquinimod is in Phase II development for Crohn's and Lupus. Further projects in clinical development comprise the two orally administered compounds, 57- 57 for SLE and Systemic Sclerosis as well as RhuDexTM for RA.
